

HDFC MFOnline Investors — Weekly App Review Pulse

Date: Jun 28 – Sep 19, 2026 | Reviews Analyzed: 40 | **Health: CRITICAL**

Top 3 Themes

Theme	%	Description
NAV & Portfolio Display	40%	NAV date/value missing, portfolio rounded not exact, XIRR per scheme gone
Login & Authentication	30%	OTP delays, accounts blocked after 3 attempts, logout loops
Payments & Transactions	15%	SIP deductions not reflecting, redemptions stuck 3+ days

Real User Voice (anonymized)

- “NAV not showing anywhere after new update. Cannot see today's NAV or units.”
- “Every time I logout it says network error. OTP not received. Login loop.”
- “SIP payment deducted but not showing in app. Very frustrating.”

3 Action Ideas

1. Product (P0): Restore NAV Dashboard — show NAV date, NAV value, exact amount, units, and XIRR per scheme.

2. Support (P0): Update the LIP-4 RAG Bot (hdfc-bot.streamlit.app) with 3 intents — “Where is NAV?”, “Login failure?”, “SIP deducted but not showing?” — to give instant workarounds and deflect ~50% of tickets until the permanent fix ships.

3. Engineering (P1): Fix the session-persistence bug causing logout → network-error loops. Add retry logic, a clear error message, and auto-unblock after 30 minutes.

LIP 5 → LIP 4 connection: LIP 5 (this review analysis) represents **Problem Discovery**; LIP 4 (the RAG Bot) represents the **Solution** — surfacing instant, accurate answers to the exact issues users are reporting here.
